

**Chemung County Stormwater
Construction Inspection
Erosion and Sediment Control**

Project Name Hilliard Building Expansion Project			Date 3-18-2020	
Location Magee Street, Elmira (city), NY			Permit # NYR10F218	
Weather Conditions sunny			Entry Time: 11:04 am	
On-Site Representative Present: None			Exit Time: 11:15 am	
Construction Site Notes:				
-Liquor store is being torn down. Dump truck parked on underground infiltration system.				
Yes	No	N/A		
	X		All erosion and sediment control measures installed/constructed	
	X		All erosion and sediment control measures maintained properly	
	X		Are there currently more than 5 acres disturbed w/o prior approval	
	X		Have stabilization measures been initiated in inactive areas	SEE NOTE
X			Are permanent stormwater control measures being implemented	
	X		Was there a discharge into the receiving water on the day of inspection	
	X		Evidence of turbidity or oil in the receiving waters	
X			Are weekly inspections being performed?	
X			Are the inspections being performed by a qualified individual?	
Corrections Needed:				
-Concrete is washed onto the side of the completed rain garden. No concrete washout installed on site.				
-Pollution prevention- construction debris (garbage and bricks) litter the side of the rain garden and project site. The site is to keep all of these items cleaned up on a daily basis.				
-Underground Infiltration System- the old liquor store is being torn down and the dump truck hauling material offsite is parked on top of the underground infiltration. This could cause possible damage to the underground system. Verification that system was not damaged may be necessary.				
-Soil stabilization is required on side slopes of rain garden. Erosion has started and sediment will eventually clog Rain garden.				
Satisfactory		Marginal	Unsatisfactory XX

PROJECT:	Hilliard Building Expansion
	City of Elmira
	Municipal Inspection
	March 18, 2020
BY:	Jessica Verrigni, CPESC, CPSWQ

Concrete has been washed out onto the side slopes of the rain garden.

Erosion has started on the side slopes of the rain garden.

Dashed area represents the approximate location of the underground infiltration system. Dump truck hauling material out is directly on top of the system.

Building debris and trash is not being picked up on the site. A pollution prevention plan is part of the approved SWPPP and needs to be followed.
