Inspector Findings

Additional Information Collected During Inspection

Comments

Visited facility to investigate complaint regarding the presence of insects (cockroaches) in cafeteria, including eating area, service area and in kitchen. Per site supervisor for summer feeding program at school, maintenance staff had been notified of insects in kitchen and roaches were found in motor of milk refrigerator and around dish area and area was treated by pest control operator. No live insects were observed during investigation at facility, however, 6-8 dead were observed on floor under dish machine area. Per site supervisor, school maintenance staff have been looking for insect activity on a daily basis and have cleaned the kitchen and eating areas and equipment. Site supervisor reports that no live insects have been observed since initial treatment and cleaning. Sanitarian recommends continued monitoring and treating as necessary and that empty cardboard boxes be removed from facility due to potential for insect harborage in corrugations.
