Number of public health hazards found: 0
Number of public health hazards NOT corrected: 0
Number of other violations found: 0

Each item found in violation is reported below along with the code requirement.

NO VIOLATIONS WERE OBSERVED.

Code Requirements

Inspector Findings

Additional Information Collected During Inspection

Comments

Checked Free Chlorine level at kitchen sink- 0.6 mg/L. Water sample was not taken during inspection. Checked wiping cloth solution- +100 ppm, Chlorine test kit was available for checking wiping cloth solution (recommend replacing chlorine test kit at kitchen sink- is difficult to read comparison chart on test kit- is faded). Digital thermometer available for evaluating hot potentially hazardous (TCS) foods, other numerical thermometers are also available in kitchen. Plastic gloves and proper utensils available for use by kitchen staff, discussed use of gloves and discussed routine hand washing with Manager during inspection. Monitoring thermometers available in refrigerated equipment used to store cold potentially hazardous foods. Also discussed cooling of cooked potentially hazardous foods with Manager- limiting food depth to 4" inches or less, using flat rectangular pans and leaving foods uncovered while cooling inside walk-in cooler. Will conduct a HACCP training exercise with Manager later in year.
