Number of other violations found: 0

Each item found in violation is reported below along with the code requirement.

NO VIOLATIONS WERE OBSERVED.

Code Requirements

Inspector Findings

Additional Information Collected During Inspection

Comments

No violations observed during time of inspection. Observed appropriate levels of quaternary ammonia sanitizer (200ppm) in sanitizing bay of three bay sink, using facility's test strips. All single use food service items stored off floor. Facility has accurate probe thermometer and several hanging thermometers in each cold holding unit and inside oven. Discussed proper hand washing and that hand sanitizer can be used in conjunction with hand washing, but not as a substitute.
