Additional Information Collected During Inspection

Comments: Observed accurate probe thermometer. Chicken patties arrived to site at a temperature of 160F. Non-potentially hazardous fruit salad containing peaches and pears in small prepackaged cups had a temperature of 40F. Facility peels apples for service using tabletop peeler and staff wear gloves to prevent barehand contact. Peeler is washed, rinsed, and sanitized after every service. Observed up to date temperature logs. Hot food is served immediately and any leftovers are placed in preheated roasting pan for late arriving children.
