Number of Other Violations Found:	0

Reinspection is not Required

Each item found in violation is reported below along with the code requirement.

NO PUBLIC HEALTH HAZARDS REPORTED

NO NON-PUBLIC HEALTH HAZARDS REPORTED

Additional Information Collected During Inspection

Comments: Observed a second bathhouse completed and properly equipped with two working toilets and two working sinks per sex. Observed sinks to be equipped with warm water, soap and paper towels for proper hand washing. This bathhouse is equipped with heat and will be open throughout the winter season. This will allow the winter camping site limit to increase to 25 sites as opposed to the original 4 sites. The operator requested that the maximum site capacity be decreased from 96 sites to 45 sites total for summer months when additional bathhouse is open. The operator is currently working on constructing a urinal for the men's restroom and constructing a third, lockable room complete with a shower and washer/dryer unit. CCHD is to be notified once shower/laundry facility are complete for inspection. There is an additional, unisex bathroom at the recreational hall that will be open during the whole year for patron use. The bathroom at the recreational hall features a locking door that is accessible to the outside, equipped with a shower, sink and toilet. Observed a free chlorine residual of 1.0 mg/L from the bathroom sink at the new bathhouse.
